PROFESSIONAL SUMMARY

Python Backend Developer with 4 years of experience building scalable backend systems, RESTful APIs, and microservices with Python 3, Django, Django REST Framework (DRF), and FastAPI. Skilled in PostgreSQL query tuning, Redis caching, Celery task queues, WebSocket streaming, payment gateway work, and production deployments. Shipped 7 projects across trading, surveillance, news, and mobile domains.

TECHNICAL SKILLS

Programming Languages: Python 3, SQL, JavaScript, HTML5, CSS3, jQuery, AJAX

Backend Development: Django, Django REST Framework, FastAPI, RESTful APIs, Microservices, WebSocket, Django Channels, API Integration, JWT Authentication, OAuth2, Pydantic, Django ORM, SQLAlchemy

Databases: PostgreSQL, MySQL, SQLite, PL/pgSQL, Stored Procedures, Query Optimization, Indexing, Database Design

Caching and Background Jobs: Redis, Celery, Cron Jobs, Asynchronous Tasks, Multithreading, Asyncio

Messaging and Distributed Systems: Kafka, Celery, TCP/IP, MCP, Event-Driven Architecture

DevOps and Deployment: Docker, Linux, Nginx, CI/CD, Gunicorn, Uvicorn, Daphne, Load Balancing, Production Deployment

Cloud Platforms and Tools: Azure, Git, GitHub, Postman, Swagger / OpenAPI, Pytest (Unit Testing)

Practices: SDLC, Agile / Scrum, Code Review, Version Control, SOLID Principles, Design Patterns, API Documentation, Debugging

PROFESSIONAL EXPERIENCE

Python Developer | CMS Info System, Navi Mumbai | Mar 2025 – Present

- Engineer RESTful APIs and microservices with 2 frameworks, Django and FastAPI, for the HawkAI CCTV monitoring product.
- Deliver features for video streams, camera configuration, and IoT device onboarding.
- Build FastAPI endpoints that manage live camera feeds under heavy data volume.
- Model Django schemas and serializers that store camera settings and device metadata.

Python Developer | Tech Quadra Software Solution, Nagpur | Jan 2023 – Mar 2025

- Maintained and enhanced Django web apps that met client performance and responsiveness requirements.
- Authored and documented REST APIs with Django REST Framework for third-party and mobile consumers.
- Accelerated response times with Redis caching and Celery background tasks.
- Connected payment gateways and other third-party services for secure transactions.

PROJECTS

HawkAI – AI Surveillance CCTV Monitoring | Mar 2025 – Present

- Contributed to an AI-powered CCTV system across 3 backend areas: IoT event ingestion, high-volume event pipelines, and alert delivery.
- Enabled ingestion of live alerts and events from connected IoT security devices.
- Architected event pipelines that absorb high-volume device traffic efficiently.
- Streamlined alert delivery so operators can react to incidents promptly.

TradeIQ – Algo Trading Platform

- Created a trading web app on WebSocket, Redis, and Daphne for algorithmic order placement.
- Coded a breakout strategy fed by streaming market data and Redis caching.
- Linked 2 external providers, TrueData (market data) and Master Trust (order execution).

AlgoEdge – Market Insights Platform

- Aggregated streaming market data into trading recommendations, delivered through 2 integrations: Telegram alerts and PhonePe payments.

Geni-Research – Trading Recommendation App

- Launched a responsive recommendation product with an intuitive interface.
- Combined multiple broker payment APIs with PhonePe for end-to-end checkout.
- Established subscription tiers with role-based permissions for multiple user groups.
- Automated Telegram delivery of recommendations and alerts.

MyKhabar24 – News Platform

- Produced a responsive news site with optimized content delivery.

KagoConnect and Suluhu – Mobile Apps

- Crafted REST API services and server infrastructure for 2 mobile apps.

EDUCATION

Bachelor of Commerce in Computer Applications
Rashtrasant Tukadoji Maharaj Nagpur University | 2021 – 2023 | CGPA: 8.9
